

PROFESSIONAL SUMMARY

Computer Science undergraduate specializing in full-stack development and AI agent integration. Proven experience architecting production-ready frontends (React, Tailwind CSS) and orchestrating complex AI workflows using Google AI Studio. Passionate about building automated agentic systems, designing scalable UIs, and solving complex debugging challenges in agile environments.

EDUCATION

VIT Bhopal University <i>B.Tech in Computer Science Engineering – Cybersecurity & Digital Forensics</i>	Bhopal, India <i>Aug 2023 – Present</i>
New Age Public School <i>Higher Secondary Certificate (PCM + Computer Science)</i>	Gadarwara, India <i>Apr 2009 – May 2023</i>

TECHNICAL SKILLS

Programming: Python, JavaScript, TypeScript, Java, SQL, Bash Scripting
Frameworks & Libraries: React.js, Node.js, Tailwind CSS
Databases & APIs: REST APIs, PostgreSQL, SQL Database Design, Structured Data Processing (JSON)
Tools & Platforms: Git, GitHub, VS Code, AWS (EC2, S3, VPC), Docker, Google AI Studio
Cybersecurity & Networking: VAPT, Application Security, OWASP Top 10, TCP/IP, OSI Model, Cryptography

EXPERIENCE

AI Software Engineering Intern <i>RV Innovators</i>	Jan 2026 – Present <i>Bhopal, India (Hybrid)</i>
- Spearheaded the full-stack development and deployment of Satya Net, an AI-driven automation platform engineered to process multi-modal data streams and detect digital anomalies. - Architected resilient backend workflows using Google AI Studio and Gemini models, leveraging structured JSON outputs and automated function/tool-calling with Google Search grounding. - Designed and implemented a scalable, highly interactive UI utilizing React and Tailwind CSS, optimizing user workflows for real-time data visualization. - Integrated automated, real-time context-aware Q&A bots using API-driven data pipelines, collaborating closely in rapid, agile sprint cycles to push features from testing to production.	

PROJECTS

Satya Net <i>React, Tailwind CSS, Google AI Studio, REST APIs, Git</i> Link	Jan 2026 – Present
- Built a full-stack automated analysis application leveraging Gemini LLMs for advanced multi-modal content validation and structured data processing. - Engineered strict JSON schemas for model outputs, ensuring seamless API data synchronization between the intelligent backend orchestrator and the frontend interface. - Developed a modular frontend layout using React, implementing version control best practices via Git to support seamless feature rollouts and continuous integration.	

CERTIFICATIONS

ServiceNow Certified System Administrator <i>ServiceNow</i>	May 2026
AWS Educate: Getting Started with Security <i>Amazon Web Services</i>	Dec 2025
Google IT Support Professional Certificate <i>Google</i>	Dec 2025
Digital Forensics Essentials (DFE) v1 <i>EC-Council</i>	Nov 2025
Microsoft Certified: Security, Compliance & Identity (SC-900) <i>Microsoft</i>	Jun 2025

ACHIEVEMENTS

Champion – 10th State Level UCMAS Mental Arithmetic Competition (Top speed and accuracy)
2nd Runner-Up – 20th International Level UCMAS Competition
